VISIONAIR**

**DON'T
GIVE UP
YOUR
IDEA**

KUBICEKVISIONAIR.COM

WE ARE KUBÍČEK VISIONAIR,

an inflatable manufacturer with more than 20 000 products created and seen in almost every corner of our planet.

Our inflatables are artistic elements, technical solutions and commercial platforms. They can be used for practically anything.

Kubíček Visionair replaces traditional and structural solutions with inflatables. We add our long-standing know-how to the needs and wishes of our customers, and by doing so, we are able to produce custom-made inflatables of all types, shapes and sizes. Our inflatables will amaze every passer-by both visually and functionally.

WE AIM TO IMPRESS

Kubíček Visionair produces unique and creative inflatables that amaze crowds all over the world. At the same time, we are a successful developer and manufacturer of large-capacity tents, which, thanks to their features, save time, costs, facilitate work and replace traditional solutions in the aviation industry.

→
**3 WAYS
YOU CAN USE AN
INFLATABLE**

1 FUNCTIONALLY AS A TECHNICAL SOLUTION

Our inflatables create space and lower costs. It's the specific nature of inflatables that saves you time, energy and money, especially in comparison to traditional built-in solutions.

KUBICEK VISIONAIR

2 CREATIVELY AS AN ARTISTIC COMPONENT

We embody your ideas into reality. Whatever your idea, our team of experienced designers will come up with a custom solution that will excite your audience.

3 COMMERCIALY AS AN ADVERTISING PLATFORM

We make your brand visible in a unique way. From traditional shapes like arches or tents to branded inflatable bouncers and special shapes based on your idea.

WHY KUBÍČEK

We draw from our 30 years' experience when creating special inflatables of any shape and size.

EASY TO USE

From installation to the transport of your inflatable, the process is easier than you might think.

1

QUICK INSTALLATION

Standard-sized inflatables (around 150 m³) are installed within 10 minutes. With bigger inflatables, we offer solutions with more than 1 external vent which result in an inflation that doesn't take much longer than with smaller inflatables.

↑ The installation of the cinema sized 9 x 7 m takes 2 people only.

2

EASY TRANSPORT

A folded standard-sized inflatable fits nicely in the boot of a car. Thanks to easy transport and quick installation, you can easily show your inflatable in more places within a single day. This makes your inflatable the perfect companion for travelling to roadshows and presentations.

↑ A cinema sized 9 x 7 m packed in the boot of a car.

3

LOW REQUIREMENTS

Everything necessary for operation is included with your inflatable (inflator fan, straps, carry bag etc.). All you need to do is just plug in the power cord.

4

OUTDOOR OR INDOOR USE

Why limit an inflatable to stationary use on the ground? We often design inflatables that hang in the air or that can even be moved during performances thanks to track-based underwater constructions.

↑ Planets with internal lighting hanging over the lake.

↑ A set of inflatable spheres is one of the dominants of the 50 m wide water stage in Qing Show theatre. Some of the spheres move during performances thanks to an underwater track-based construction.

↑ An inflatable statue of Bohuslav Fuchs, which traveled around Brno.

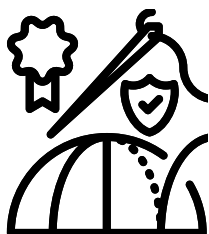

5

NO NEED OF ELECTRIC SUPPLY

We've also designed inflatables with no electric supply. Instead, we use batteries hidden inside the inflatable.

↓
**ATTENTION
TO DETAIL**

↑ Our inflatable Nanostructure is made of 1,086 parts sewn together with approx. 8000 m of thread.

Almost the entire manufacturing process takes place in our factory in Brno. Our inflatables are sewn from thousands of parts by seamstresses that pay attention to the tiniest detail. We also cooperate with some of the best printing companies out there. Today, you'll see no difference between the graphics on our inflatables and the real deal. Our inflatables are always thoroughly inspected and undergo strength testing before handover.

↑ The Tsusho monkey has been a part of Toyota's Prague branch for 15 years.

**FLEXIBILITY,
COOPERATION,
OUR ANSWER IS
YES**

↙ **LONGEVITY
AND QUALITY
WORKMANSHIP**

Whether outdoors or indoors, we manufacture inflatables with more than 10 years of lifetime. We select materials to ensure maximum longevity of all inflatables, thus all textiles and accessories used meet certification according to EU standards.

"If you ask whether we can make it, we'll always say yes. Together, we then figure out the best way to do it."

This is the work at Kubiček. We are always ready to materialize your ideas or modify and adapt the inflatable to suit your specific needs. We will never give up on your idea!

Inflatable
maintenance

AFTERSALES CARE AND SERVICE OF YOUR INFLATABLES

After-sales care is second to none. The Kubiček factory team is always ready to help you. Whether engineering new inflatables or taking care of those already produced, we believe there is "always a solution", as this is one of our highest values.

Have a question regarding the maintenance or service of your inflatable? Please don't hesitate to contact us.

**WE WILL ALWAYS
DO OUR BEST TO
HELP YOU.**

» EXPERTISE

All our inflatables are engineered by our team of technical experts. Having produced thousands of inflatables, their unrivalled know-how and expertise allow us to tailor your inflatable in any way you desire.

TECHNICAL INFLATABLES

**THE SPACE AND COST
SAVING SOLUTION**

Today, an increasing number of industrial companies are turning to inflatables as a solution that saves them space, time and effort.

ISOLATION

Inflatable walls serve mainly for thermal isolation and space separation. Other than that, our inflatables will also help with noise elimination or find use as hangers for banners among other functional benefits. At Trade Fairs Brno, the 54 m wide wall separates the pavilion into 3 independent fairs and saves up to 66 % energy by doing so.

QUICK USE

In comparison to built-in solutions, all you need to do is plug in a power cord, arrange your surroundings and wait a few moments, until your object is fully inflated. Your packed inflatable easily fits in the boot of a car or truck.

WORKING SPACE

Whether operated with air conditioning during hot summer days or with insulation during cold winters, inflatables have the ability to optimize production.

Take a look at the initial visualization of a tent. The tent replaces the traditional hangar for smaller aircraft. It has unique insulating properties which make it possible to be serviced even during cold winter months.

ART INFLATABLES

**WE EMBODY YOUR IDEAS
INTO REALITY**

Our inflatable solutions give you the creative space to think outside the box. Whatever your idea, our team of experienced designers will come up with a custom solution that will excite your audience.

The **HYDROZOA** pavilion is in the permanent exposition of the Central Slovak Gallery, where visitors have the opportunity to walk through the center of the inflatable.

**➤ CUSTOM
SIZE, SHAPE
& ENVIRONMENT**

We've manufactured thousands of inflatables of different shapes and sizes. Whether small or 25 m long, whether outdoors/indoors, on the water/ in the air, we'll always do our best to arrange the perfect custom solution that best suits your needs.

➤ IMPRESS

In cooperation with our clients, we have created products seen by thousands of people at all possible types of events.

Besides the traditional real-time experience we've cooperated with various production companies, and more and more of our inflatables can be seen in TV advertisements, movies and TV series.

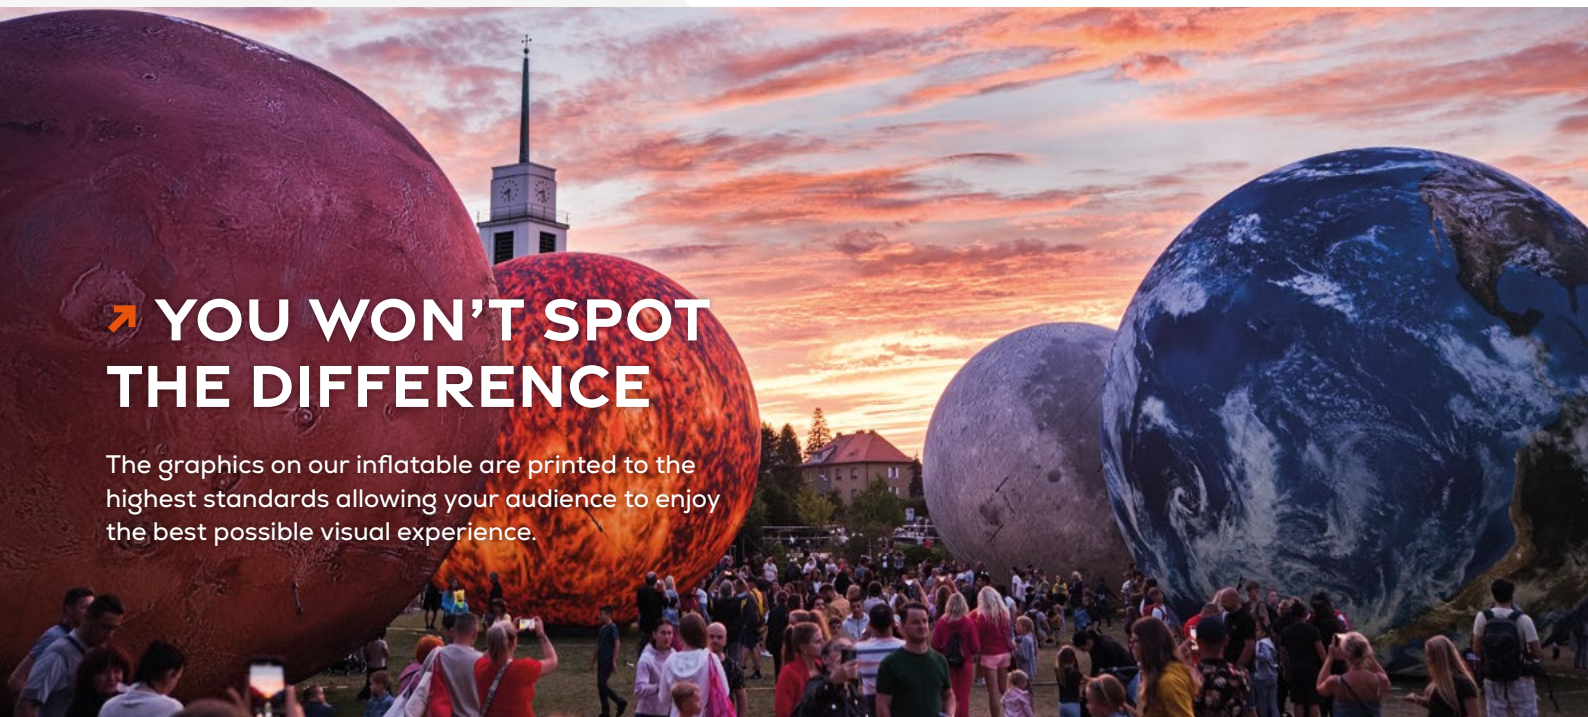

➔ RESISTANCE

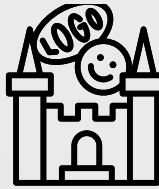

Want to use an inflatable interactively rather than just look at it? Thanks to the resistance of our fabrics, we offer solutions that even let you walk on the inflatable.

➤ YOU WON'T SPOT THE DIFFERENCE

The graphics on our inflatable are printed to the highest standards allowing your audience to enjoy the best possible visual experience.

COMMERCIAL INFLATABLES

**MAKING BRANDS VISIBLE
IN UNIQUE WAY**

From traditional shapes like arches or tents to branded inflatable bouncers or special shapes based on our clients' ideas, we are able to create platforms which increase the visibility of our client's brand.

➔ SPECIAL SHAPES

Have a product you would like to promote in a much more visible way?

Get the attention of your audience with something unique and unusual.

We can materialize almost any shape for a presence on a bigger platform as we've done with many globally notorious brands.

➔ INFLATABLE BOUNCERS

What better way to keep kids entertained, anywhere and everywhere!.

SAFE

Our inflatables are all subjected to testing with certification awarded by TIF. Every single one of our inflatables is certified for safe operation..

KNOW-HOW

Thanks to 30 years of experience, we have the ability to create custom shapes with different functionalities. Simply put, we won't give up on your idea.

Aside from standard shapes and sizes, we come up with custom designs based on our customer's preference.

OUR SPECIALITIES

Get on board with our specialities,
that are much in demand.

↑ AIR CINEMA

Inflatable cinemas of highly durable materials
for your best experience simply anywhere.

FAST INSTALLATION

No more wasted time – all the
installation of Air Cinema takes is
2 people and a few minutes.

USE ANYWHERE/ EVERYWHERE

In the garden / field / car park
/ by the pool / hall / indoors or
outdoors... simply anywhere.

PERFECT PORTABLE SIZE

The whole inflatable cinema will fit
in the boot of a car when folded.

Alongside the inflatable and all its necessary equipment, we'll help you
choose the right data projector and audio system. We test both audio
and visual technologies for all cinema sizes.

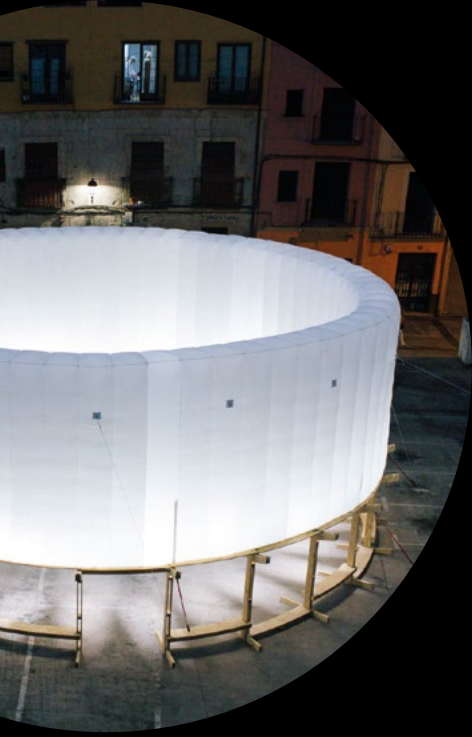

PLANETS ↗

Have you seen them?

Inflatable planets and space entities are the headliners of the popular event Planet Festival held in our hometown Brno. They were also on show at one of the biggest events in recent years – Dubai Expo 2020. Besides that, they are also quickly gaining attention in the UK, Germany, Switzerland, Slovakia and Romania.

Aside from entertainment purposes, our planets are increasingly used as effective educational tools at schools.

← AIR SQUARE

We partnered with architecture studio KOGAA to create a mobile venue that activates underused urban spaces and gives people a place to relax and chat. The upper ring is designed as a large shading system that mitigates, cools, and delivers refuge from heat. At night it provides illumination to dark and less safe urban corners.

Air Square suits multiple functions and purposes, such as performances, farmers markets or all-in-one public furniture with seating, lighting and shading systems.

**Ready
to assemble
and reusable!**

SEASONAL DECORATIONS

Ideal for shopping malls, crowded urban areas or retailers. Lift up people's spirits and get them in the festive spirit with our unique inflatable decorations, whether it be Christmas, Valentine's Day or any other occasion.

OUR FABRICS

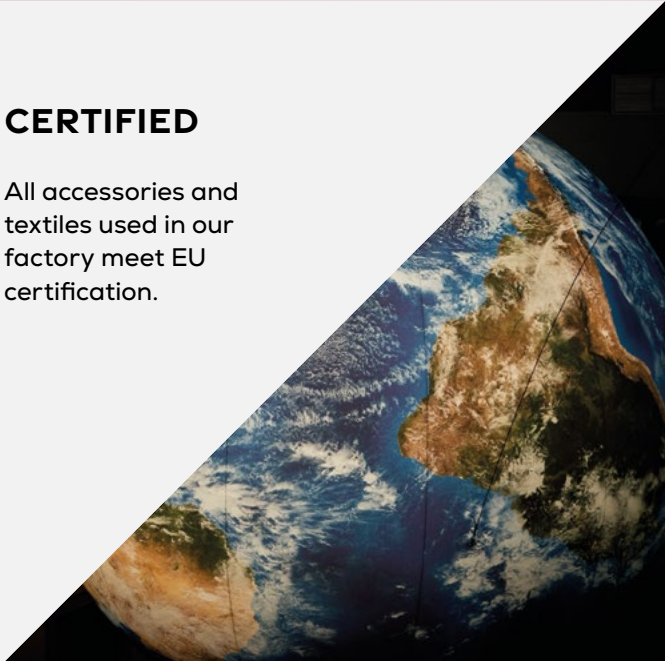

Technical fabric with higher strength and durability.

RESISTENT

Thanks to its special structure, our fabric will survive a whole lot more than your typical fabric. All our fabrics undergo methodical strength testing before use. As a result, our inflatables can be in use for well over 15 years, even outdoors.

CERTIFIED

All accessories and textiles used in our factory meet EU certification.

GRAPHICS IN THE HIGHEST QUALITY

We are constantly improving our technologies. This is why today, you won't spot the difference between our printed graphics and a satellite image.

All our graphics are printed "in house" or with certified suppliers. As a result, we can guarantee top quality.

WATERPROOF

Thanks to the airtight coating application, all our inflatables are waterproof. That means you can wash them with water to ensure your inflatable looks brand new for a very long time.

OWN DEVELOPMENT

Apart from our main branch in Brno, we also operate in Černá Hora. Here, our team of textile specialists is constantly at work developing textile that's top-notch quality and at the same time is constantly being pushed to even higher standards.

Our technical team will always help you choose the fabric that perfectly suits the purpose and surroundings of your chosen inflatable. The two most popular choices are PVC textile and 100% Polyester.

FREQUENT QUESTIONS

↓ WHAT SIZES AND SHAPES ARE POSSIBLE?

The height of inflatables usually ranges from 2 to 20 metres. However, we have also manufactured inflatables over 20 metres wide. We can say with confidence that for us, no size is impossible. The same applies to the shape of your inflatable.

↓ WHAT'S THE LIFESPAN OF AN INFLATABLE?

We have inflatables that have been in permanent operation for more than 16 years.

↓ HOW LONG DOES PRODUCTION TAKE?

The total production time is affected by the required size and shape. Generally, production lasts between 1 and 5 weeks, but we always specify the production time for your order.

↓ HOW IS THE INFLATABLE INSTALLED?

After unpacking, it's necessary to anchor the inflatable with a set of pins and anchor ropes or sandbags. It's similar to building a tent, the method of anchoring depends on the size, shape, surroundings and weather conditions. Once anchored, all you need is an electric supply. Air flows into the inflatable continuously, making it possible to be operated in different conditions.

↓ WHEN CAN I USE AN INFLATABLE?

In general, inflatables can be used throughout the year with an air temperature range from -10 °C to + 40 °C. We don't recommend the use of an inflatable at wind speeds above 15 m/s and rainfall over 3 mm/h. However, we always specify conditions of use and if necessary, we propose technical modifications that will improve all safety criteria.

← Current condition of the inflatable with a lifespan of 16 years.

ACCESSORIES

Besides the inflatable, you get all the necessary accessories. Remember, all you need is electrical energy. So, what's included?

↑ INFLATOR FAN – internal or external

↑ STRAPS AND ROPES

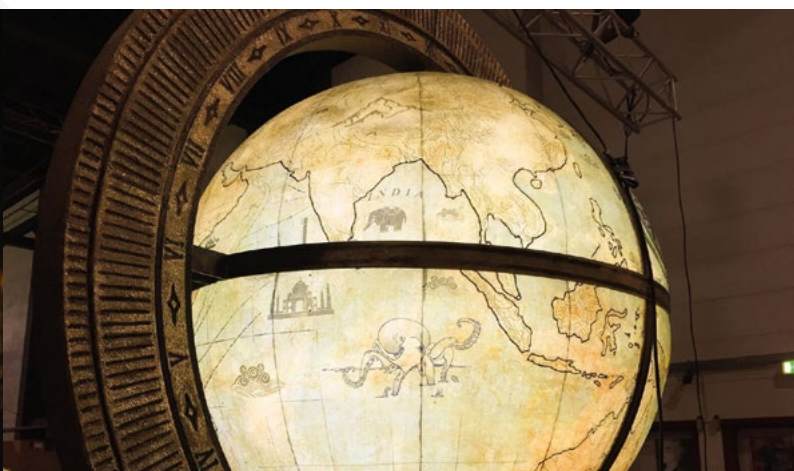

↑ CARRY BAG FOR INFLATABLE

↑ GROUND ANCHORS

If you want to avoid the necessity of an electric supply altogether, we can produce inflatables that use batteries hidden inside.

Optional accessories that go along with your inflatable include internal or external lighting, and handling underlay. We can also offer specialities like sandbags, compressor hoses or padded boxes for fan soundproofing.

YOUR IDEA, OUR SOLUTION

1

CONSULTATION

Based on your wishes and suggestions, we'll create a complete 3D model of your future inflatable. You'll discuss the solution with our team, suggest changes and together, we'll make sure it meets your idea.

2

PREPARATION OF FABRIC

First, we'll print the fabric with graphics of the highest quality. Once printed, our cutting machine cuts the fabric, which is then tailored by our seamstresses.

3

COMPLETION

After we put together all the necessary technical components selected precisely for your inflatable, your product is ready to be used.

4

TESTING

Just before handover, we always inflate and test all inflatables. As it is a matter of company policy, we are dedicated to creating products only in the highest quality. If necessary, the inflatable goes back to the factory for inspection and repair. The customer can also take part in the first inflation which allows you to check out your inflatable first-hand.

5

SUPPORT

We'll brief you on how to use your inflatable. After handover, we stay in contact with our clients. We'll help you with the first installation if necessary, and you can also come to our factory in Brno where we take care of the maintenance of all our inflatables.

KUBICEK FACTORY IN NUMBERS

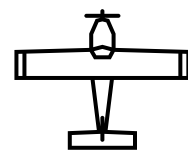

DURING KUBICEK'S 30 YEARS OF EXISTENCE, WE HAVE
PRODUCED MORE THAN...

20 000
inflatables

2 600
hot air balloons

9
airplanes

**WE ALSO MANUFACTURE
HOT AIR BALLOONS AND
AIRCRAFT**

KUBICEK

At Kubíček Factory, we produce not only special inflatables but also hot air balloons and ultralight or LSA aircraft.

We build products for the air in many different forms. Our hot air balloons (Kubíček Balloons) soar on air currents, our custom inflatables (Kubíček Visionair) depend on air whilst our airplanes (Kubíček Aircraft) slice right through it!
